Name: Sahil Pathak

Qualification: Pursuing PhD.

Year of Experience: 10+ Years

Sahil Pathak is an accomplished Assistant Professor in the Department of Computer Science with a strong academic and research background. He is currently pursuing his Ph.D., focusing on cutting-edge topics within the realm of computer science. Sahil earned his Master of Technology (M.Tech) degree from Jawaharlal Nehru University in New Delhi, demonstrating his dedication to academic excellence.

His research interests encompass a diverse range of areas within computer science. He has made notable contributions to the fields of Wireless Networks, Sensor Networks, Internet of Things (IoT), Game Theory, Graph Theory, System Programming, and Advanced Algorithms. His multifaceted approach to research demonstrates his versatility and ability to adapt to emerging trends and challenges in the field.

Apart from his research endeavours, Sahil Pathak is also dedicated to enhancing the learning experience for students and professionals alike. He has conducted online sessions, developed comprehensive e-content for subjects like Computer Networks and System Programming, and even created a Massive Open Online Course (MOOC) to make high-quality educational resources accessible to a wider audience.

His expertise in computer science extends beyond academia. He has actively participated in conferences, sharing his insights and knowledge with fellow researchers and professionals. His contributions to the academic and professional communities highlight his commitment to advancing the field of computer science.
